

Comprehensive Breast Care Services

At HealthAlliance, our comprehensive breast care program provides complete and compassionate care for breast patients.

Our highly trained, caring specialists from a variety of medical disciplines have a longstanding commitment to women's health. They work together to provide a thorough diagnosis and the very best treatment plan, and deliver a range of medical and supportive services focused on you, not just your disease.

Every patient receives expert, accurate and rapid diagnosis and treatment, including access to the most up-to-date technology. You also benefit from the expertise of specialists in surgical oncology, medical oncology, radiation oncology, mammography and diagnostic imaging, psychosocial and spiritual support, nursing, physiotherapy and rehabilitation medicine, and nutrition. In addition, you and your family can participate in a wide variety of support groups.

A key element of our success is the bond that develops between our clinicians and their patients and family members. We are very invested in our patients and listen closely to and respect their expectations and needs.

We at HealthAlliance are proud to be known for our breast patients' outstanding quality of care and positive patient outcomes for our breast patients, from diagnosis through survivorship. Spanish-language appointments are available in all areas on an individual basis upon request.

Fern Feldman Anolick Center for Breast Health

The **Fern Feldman Anolick Center for Breast Health** offers a full range of advanced breast screening and diagnostic services, including full-field digital mammography, ultrasound, stereotactic breast biopsies and ultrasound image-guided breast biopsies. It also offers bone-density tests to determine if you have osteoporosis, a disease that causes bones to become more fragile and more likely to break.

HealthAlliance's breast health specialists understand the anxiety associated with a breast concern and work to give you a prompt, accurate diagnosis.

A caring, certified breast cancer patient navigator is available to help guide you through the healthcare system, providing health resources and support systems. She also serves as a confidential, personal guide through the psychosocial and emotional challenges cancer can bring.

The Center for Breast Health is part of the comprehensive breast care program at HealthAlliance Hospital: Mary's Avenue Campus. Our integrated practice brings together a multispecialty cancer treatment team of experts to ensure you get the best care available. The experts include breast health specialists, radiation oncologists, medical oncologists, surgeons, plastic surgeons, pathologists, radiologists and a skilled support staff — all working as a multidisciplinary team to provide whole-person care for women. The center is widely recognized for its medical excellence and integrative approach to cancer prevention, diagnosis and treatment.

For more information about the breast health center, phone 845-334-3099. To schedule an appointment, call 845-334-3088.

The Department of Radiation Oncology's Ulster Radiation Oncology Center combines the quality and capability of state-of-the-art equipment with the expertise and compassion of board-certified radiation oncologists. Our specialists design treatments with pinpoint accuracy, ensuring tumors get the most effective dose while minimizing radiation to healthy tissues. 8 a.m. to 4:30 p.m. Monday through Friday. 845-339-7700.

The Oncology Support Program seeks to ensure no one faces cancer alone. Our compassionate professionals and volunteers offer support to patients, their families and friends. Experience prevention, wellness and healthy-survivorship programs, including support groups, art and healing programs, tai chi, yoga and qigong. Many activities take place in our homelike Reuner Cancer Support House, 80 Mary's Ave. in Kingston. 845-339-2071.

Our Tumor Board, part of HealthAlliance's American College of Surgeons' Commission on Cancer accreditation, provides regular multidisciplinary reviews of new patient cases to determine the best treatment plan and ensure coordinated care. The board includes medical, surgical and radiation oncologists, as well as specialists from radiology, pathology, spiritual care, clinical nutrition, oncology support, oncology nursing, patient navigation, quality and safety. Certified cancer registrars document all patient histories, diagnoses, treatments and statuses.

Inpatient Oncology Care: If hospitalization is needed, HealthAlliance offers innovative inpatient oncology care. The care is provided by a highly specialized multidisciplinary team of medical doctors and support staff. Our nurturing environment — providing inpatient medical oncology and chemotherapy — encompasses the physical, social, emotional and spiritual needs of patients and families. Our nurses are well versed in pain and symptom management and strive to provide a comfortable, pain-free setting during all care phases. 845-334-2836.

HealthAlliance Clinical Nutrition Services provides oncology nutrition counseling to assist patients with setting and reaching goals of proper nutrition before, during and after treatment. 845-334-3088.

Breast Imaging at the Fern Feldman Anolick Center for Breast Health at HealthAlliance Hospital: Mary's Avenue Campus includes full-field digital mammography, the most technologically advanced equipment available for the early detection of breast abnormalities, and breast ultrasound. 845-334-3088.

Breast Ultrasonography and Ultrasound Breast Core Biopsies are performed by registered diagnostic medical sonographers and read by board-certified radiologists. We offer this service from 7:30 a.m. to 4:30 p.m. Monday through Friday. We also handle immediate cases on an individual basis. 845-334-3088.

Certified Breast Cancer Patient Navigation ensures seamless, coordinated care among your physicians, diagnostic tests and cancer treatments, while offering education, guidance and support as you and your family cope with the psychosocial and emotional challenges cancer can bring. 845-334-3099.

The Department of Pathology, certified by the American Board of Pathology and staffed by pathologists from Affiliated Pathology Services, provides accurate, timely and cost-effective pathology services to patients and physicians. We maintain the highest levels of quality to ensure the most accurate diagnostic services. The department is open from 8 a.m. to 5 p.m. Monday through Friday, but a pathologist is always available on call.

Physical Medicine and Rehabilitation can be integral to breast cancer recovery. Our manual therapists are trained to restore scar tissue mobility, range of motion, flexibility, strength, and muscular and cardiovascular endurance. 845-334-2870.

The Spiritual Care Department seeks to offer a restorative and healing presence through attentive listening, prayer and meditation. Our compassionate caregivers support people of all spiritual paths in their joys as well as their pains, losses and anxieties. Call 845-338-2500 ext. 4344 or ext. 4043 on the Mary's Avenue Campus or the operator on the Broadway Campus.
